We want to take a moment to introduce EDC Moving Systems to the Atlas Van Lines Family. We are very proud to be a member of Atlas Van Lines.

EDC Moving Systems was founded in 1976 in Houston, Texas and we have been providing excellent service to our customers ever since. The name Texas is derived from tejas or teyas, the rendering by the Spanish in the mid-16th century of the Caddo people's word for friend or allies. EDC hopes to be your Texas friend as a new member of the Atlas family.

You can be sure that your loyal customers will always receive the best, most effective and satisfying service. Each of our 4 modern warehouses offers a combined 400,000 square feet of space, with barcode inventory and order tracking. We provide transportation services through a modern fleet of 75 power units and 35 trailers. Our customer service personnel have the skills and the tools to provide the right solutions to your service request.

After 25 years of affiliation with another van line, we chose to move to Atlas Van Lines. Atlas was the best choice for us and we are excited to be approved to join the Atlas family.

We look forward to working with you in the future.

**EDC is committed to providing excellent service.**
